BEAUFORT SCALE

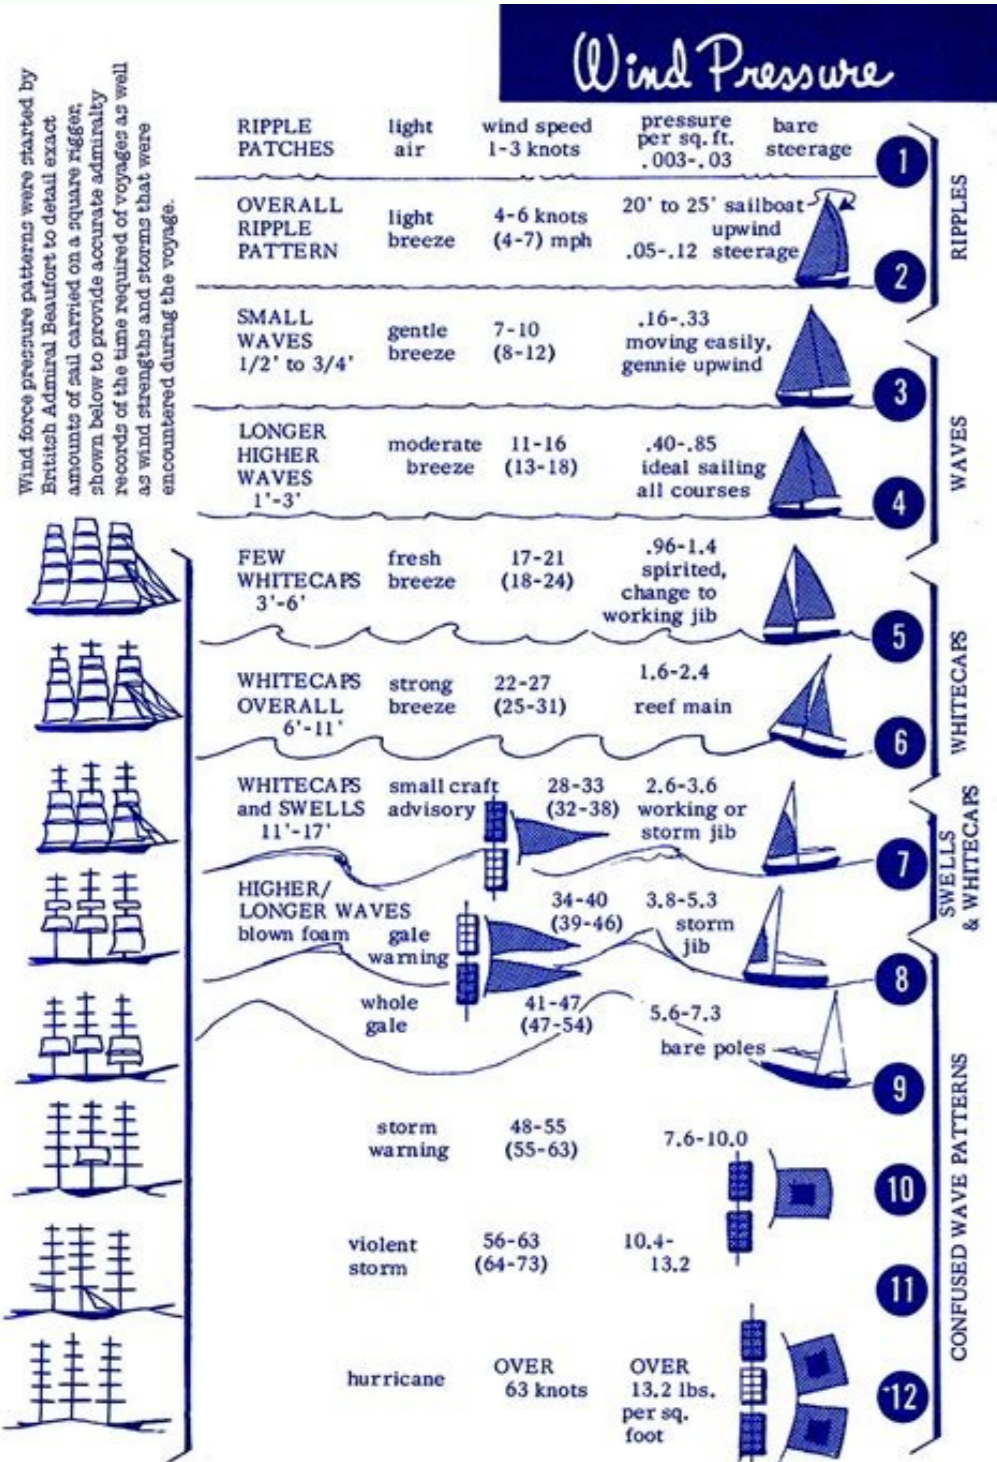

Force	Anemometer reading	Description	Effect on kite
	mph kmh m/s knts		
0	0-1 <1 <0.3 0-1	Calm; smoke rises vertically.	Calm Launch frustration
1	1-3 1-5 0.3-1.5 1-3	Direction of wind shown by smoke drift, but not by wind vane.	Light air Very large lightweight Rokkaku etc. may fly on a light line
2	4-7 6-11 1.5-3.3 4-6	Wind felt on face; leaves rustle; ordinary vanes moved.	Light Breeze Sustain (B3) lots 650g at 3.5mph
3	8-12 12-19 3.3-5.5 7-10	Leaves and small twigs in constant motion; wind extends light flag.	Gentle Breeze Drivage needed on flowform kites
4	13-18 20-28 5.5-8.0 11-16	Raises dust and loose paper; small branches are moved.	Moderate Breeze Reduce kite size increase line weight & drage size
5	19-24 29-38 8.0-10.8 17-21	Small trees in leaf begin to sway; crested wavelets form on inland waters.	Fresh Breeze
6	25-31 39-49 10.8-13.9 22-27	Large branches in motion; whistling heard in telegraph.	Strong Breeze
7	32-38 50-61 13.9-17.2 28-33	Whole trees in motion; inconvenience felt when walking.	Near Gale
8	39-46 62-74 17.2-20.7 34-40	Breaks twigs off trees; generally impedes progress.	Gale
9	47-54 75-88 20.7-24.5 41-47	Slight structural damage occurs (chimney-pots and slates removed).	Severe Gale
10	55-63 89-102 24.5-28.4 48-55	Seldom experienced inland; trees uprooted; considerable structural damage occurs.	Storm
11	64-72 103-117 28.4-32.6 56-63	Very rarely experienced; accompanied by widespread damage.	Violent Storm
12	73-83 ≥118 ≥32.6 64-71	Hurricane	

KAP not possible without severe risk of injury to operator and equipment.

The Beaufort Wind Force Scale

In the 1830s, Sir Francis Beaufort, a Royal Navy Officer, developed the scale that relates observable wind conditions to the sails of ships at sea. In 1916 the scale was changed to reflect wind conditions on the sea. In 1923, George Simpson, Director of the UK Meteorological Office adapted the scale to include observable land conditions.

No.	Description	Wind Speed	Land Conditions	Sea Conditions
0	Calm	< 1 km/h < 1 mph	Calm. Smoke rises vertically.	Flat
1	Light Air	1.1 – 5.5 km/h 1 – 3 mph	Smoke drift indicates wind direction; light wind. Leaves rustle. Weather vane does not move.	Ripples without crests.
2	Light Breeze	5.6 – 11 km/h 4 – 7 mph	Wind felt on exposed skin. Leaves rustle, weather vanes begin to move.	Small wavelets. Crests with glassy appearance, not breaking.
3	Gentle Breeze	12–19 km/h 8–12 mph	Leaves and small twigs constantly moving. Light flags extended.	Large wavelets. Crests begin to break; scattered whitecaps.
4	Moderate Breeze	20–28 km/h 13–17 mph	Dust and loose paper raised. Small branches begin to move.	Small waves with breaking crests. Fairly frequent whitecaps.
5	Fresh Breeze	29–38 km/h 18–24 mph	Branches of a moderate size move. Small trees begin to sway.	Moderate waves of some length, many whitecaps. Small amounts of spray.
6	Strong Breeze	39–49 km/h 25–30 mph	Large branches in motion. Whistling heard in overhead wire. Difficult to use an umbrella. Empty garbage cans tip over.	Long waves begin to form. White foam crests very frequent with airborne spray.
7	High Wind, Moderate Gale, Near Gale	50–61 km/h 31–38 mph	Whole trees in motion. Effort needed to walk against the wind.	Sea swells up. Foam from breaking waves blows into streaks along wind direction. Moderate amounts of airborne spray.
8	Gale, Fresh Gale	62–74 km/h 39–46 mph	Some twigs broken from trees. Difficult to steer a car on the road. It is difficult to walk against the wind.	Moderately high waves with spray blowing from crests of waves. Streaks of foam blowing along wind direction.
9	Strong Gale	75–88 km/h 47–54 mph	Large branches break off of trees; some small trees blow over. Construction and temporary signs and barricades blow over.	High waves with crests that roll over. Dense foam blown along wind direction. Large amounts of airborne spray reduce visibility.
10	Storm, Whole Gale	89–102 km/h 55–63 mph	Trees are broken off or uprooted, saplings bent and deformed. Shingles in poor condition peel off of roofs. Damage to buildings.	Very high waves with overhanging crests. Large patches of foam give sea a white appearance. Waves tumble with heavy impact. Large amounts of spray reduce visibility.
11	Violent Storm	103–117 km/h 64–72 mph	Widespread damage from wind. Damage to vegetation. Many roofing surfaces damaged, asphalt tiles that have curled up and/or worn due to age may break away completely.	Exceptionally high waves. Very large patches of foam cover much of the sea surface. Very large amounts of airborne spray severely reduce visibility.
12	Hurricane Force	≥ 118 km/h ≥ 73 mph	Widespread destruction from wind. Very widespread damage and destruction to trees. Windows may break; mobile homes and poorly constructed sheds and barns are damaged. Debris may be hurled about.	Huge waves. Sea is completely white with foam and spray. Air is filled with spray; poor visibility.

COA - Contract of Affreightment

- Contract of Affreightment is usually a contract for the carriage of a specified type and quantity of cargo, covering two or several shipments and running over a long period.
- In the COA it is the cargo and not the vessel that has a central position.
- The vessel owner undertakes to provide cargo-space (at a specified time, and for a specified freight) to the merchant who is liable for payment whether or not the cargo is ready for shipment.
- This contract addresses issues associated specifically with a vessel, its crew, and the routes on which it will be plied.
